

THE GUND COMPANY

Manufacturers & fabricators of engineered material solutions

Testimonial from Pierre Hallet, Owner of Isolants Victor Hallet sa

My first experience with The Gund Company was in 2011 to save my facilities in Shanghai.

I was introduced to The Gund Company team in China, and in a couple of days they succeeded to retain the workers and resume production. Our main suppliers and most importantly our customers were happy.

The Chinese team including Pujia Xu and Victor Zhai were very humane and professional. Although in the end, the partnership did not result in a joint venture, we always understood and respect each other's companies and continued learning from each other.

We have grown separately now as independent companies, but we still keep in mind the great work we did together in China.
